#### TRADING STRATEGY

The portfolio manager takes long positions in the best opportunities in global equity markets and actively seeks out attractively valued shares to maximise long-term growth.

#### INVESTMENT OBJECTIVE

The portfolio manager seeks to outperform the CPI with 3%, while also seeking to limit downside risk to general stock market declines. Although the returns are dependent on general market movements, stock-picking skills of the portfolio manager also attributes significantly to the overall portfolio performance.

#### RISK MANAGEMENT

The portfolio manager only invests in shares viewed as being attractively valued and which may offer superior long-term investment growth. The portfolio manager has a disciplined approach to reducing risk, shares can be volatile investments and there is a meaningful risk of capital loss over the short term.

Global currency movements may also impact investment gains or declines.

#### WHO SHOULD INVEST?

Investors who are comfortable seeking moderate to high risk tolerance, long-term capital appreciation and income by investing in a diversified mix of global equities. Typically have an investment horizon of more than three years and are comfortable with stock market fluctuation, i.e. short- to medium-term volatility.
